

Dear FCC,

Last Christmas I recieved XM Radio as a gift. I love it. I commute to New York City from New Jersey everyday, their traffic and weather stations are the best in the area. No coomercials no music no news just the traffic and weather. Everyday I see more and more XM radio antennas on the roof tops of cars. It is a service that I would never regret paying for. I understand that you do not see over most issues like fuel costs and since I live in NJ auto insurance costs. Please do not take something as important as this is to away. I have sit back and watched all that has been done to edit the airwaves across the country, but this no please help me make my commute easier, don't take away my XM radio traffic and weather.

Thank You,
Russell D. Stuart
